Dan Adams, Manager Engineering, Queensland Steelworks. I lead Maintenance and Engineering Governance for multiple steel production sites, and I am responsible for the safety, availability and throughput of our plant.

I am responsible for designing and delivering major projects across Australia and New Zealand, including major projects in the steel, mining and infrastructure sectors. My role is to take new technologies and improve safety and reliability standards to meet the needs of our customers.

Brian Casul, Senior Engineer, Arrium Pty Limited. I am the Team Leader for the Qld Rail Team at Aringa. My team includes a broad range of engineers and graduates. I also lead Aringa’s Australasian Project Team to provide financial, technical and commercial assurance, risk management and control and project and program management internally to executive management and externally to stakeholders, customers and contractors to ensure our project teams are delivering successful projects.

I am responsible for the development of the Comeng trainset in Victoria, Australia, including the upgrade of track, signaling and control systems, and I am responsible for the design of new rail projects.

Tristan Smith, A1 Unit Manager, Electrical, Mechanical, Design & Management, Queensland. I am responsible for the design and delivery of a range of projects, including major projects in the steel, mining and infrastructure sectors. My role is to ensure that our projects are delivered safely, on time, on budget, and to the highest quality standards.

I lead the team to deliver major preventative maintenance projects. I am responsible for the design and delivery of major projects across Queensland and Victoria, including major projects in the steel, mining and infrastructure sectors. My role is to ensure that our projects are delivered safely, on time, on budget, and to the highest quality standards.
